A Landmark Announcement: Introducing EMBEDRIX

Get ready to experience the future of embedded systems. We're proud to announce the launch of **EMBEDRIX**, it is more than just a technology event—it is a movement toward building smarter, faster, and more secure embedded solutions. Attendees will gain insights from global experts, explore cutting-edge innovations, and network with peers shaping the future of technology.

Join us as we unveil a collaborative platform built to address the critical issues you face every day, from ensuring **end-to-end tool integration** to achieving compliance with strict **safety and security standards**.

The Future is Defined by Software

The embedded world is being transformed by software, but fragmented toolchains and siloed workflows are holding you back. EMBEDRIX provides a clear path forward. We will demonstrate how to build a fully integrated, end-to-end solution for your product development lifecycle, from requirements management to verification and validation.

**Be Part of the Movement.
Secure Your Spot.**

[**Confirm Your Tickets**](#)

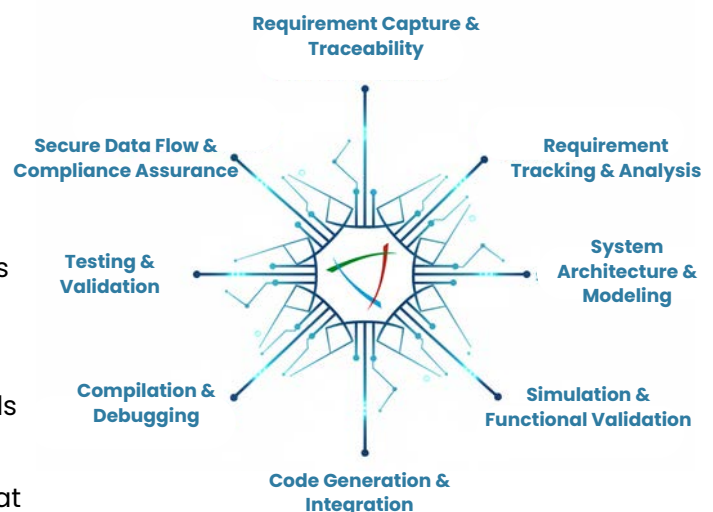

You'll discover how to:

- **Create a single source of truth** for all requirements, ensuring full traceability.
- Establish a **secure and reliable foundation** for your software-defined systems with a proven, certified operating system.
- **Achieve seamless integration** between design models and code using Model-Based Systems Engineering (MBSE).
- **Standardize your development environment** to improve portability and debugging.
- **Automate testing** with cross-platform frameworks and integrated CI/CD pipelines.
- **Simplify compliance** with certified tools and integrated ALM/PLM platforms.

Event Highlights: A Day of Discovery

- **Keynote and Technical Sessions:** Hear directly from Technology partners, **Green Hills Software, Dassault Systèmes, and Parasoft**, as they share insights and solutions. Topics include the evolution of embedded software, foundational operating systems for security, and integrated workflows for development and testing.
- **Live Demonstrations:** Experience our solutions in action through dedicated sessions and an exhibition area. See how to implement a fully integrated workflow that spans requirements, design, coding, and testing.
- **Networking with Experts:** Connect with top professionals in a relaxed, collaborative environment. Share challenges, discuss solutions, and build relationships that will drive your projects forward.

One Platform Unified Solutions

Why You Can't Miss EMBEDRIX

This is your opportunity to move beyond fragmented development processes and embrace a unified, secure, and safe approach.

- **Gain actionable insights** from the leaders in embedded software.
- **Witness powerful, integrated solutions** that will save you time and resources.
- **Build a professional network** that will support your work for years to come.
- **Lead the charge** in defining the next generation of embedded technology.

Who Needs to Be There?

This event is tailor-made for professionals who are ready to transform their embedded systems development process. You should attend if you are:

- **A Technical Expert**—including **Systems Engineers, Software & Solutions Architects, and Technical Leads**—looking for integrated solutions to improve your workflow and toolchain.
- **A Managerial Leader** like a **Project Manager or Solutions Architect** responsible for technology strategy, efficiency, and compliance.
- **A Product Developer** in **automotive, aerospace, defense, or electronics** who needs to build safer, more secure, and higher-quality products.

A Glimpse into the Day

Our agenda is designed to provide maximum value, blending high-level strategy with practical, hands-on knowledge. You'll move from insightful keynote speeches to deep-dive technical sessions and live product demonstrations that showcase the power of a truly integrated workflow.

09:00 – 09:30 – Registrations

09:30 – 09:45 – Introduction

09:50 – 10:20 – Key Session - Evolution of Embedded Software – How did we get here and where are we headed? by Green Hills Software

10:25 – 10:55 – A Single Source of Truth: Unifying Requirements for End-to-End Traceability by Dassault Systèmes

11:00 – 11:20 – Hi-Tea

11:25 – 11:50 – User Story

11:55 – 12:40 – Tech Session - Operating Systems: The foundation for safety and security in a software-defined system by Green Hills Software

12:45 – 01:45 – Lunch

01:50 – 02:20 – The Digital Thread: Seamlessly Connecting Models and Code with MBSE by Dassault Systèmes

02:25 – 02:50 – User Story

02:55 – 03:25 – Smarter Integration for Smarter Systems: Parasoft with AI in Connected Ecosystems by Parasoft

03:30 – 03:50 – Hi-Tea

03:55 – 04:45 – Integrated Workflow by Trident Infosol

04:45 – 05:00 – Closing session
